

HW 3 SChE Safety Certificate

**CHEMICAL AND FUELS ENGINEERING 4903**

**Fall Semester 2017**

3<sup>rd</sup> Assignment

Submit your work on Canvas

Log onto the [SChE Student Safety Certificate Program](#) and complete the Level 1 course. You can do Level 2 course if you are interested but only Level 1 Certification is required for this HW assignment. Once you have completed your certification, pdf print out the certificate indicating that you have completed the Level 1 (or 1 and 2) course and submit it on canvas.

The Level 3 course should be completed after you have found a job and know the industry you are going to work for.

Some of the students may already have done this for another class. You can submit your previously attained SChE Safety Certificate to meet this HW requirement without going through the materials again.
